BUSINESS PRESENTATION 2024.

ABOUT US

TIME - WARRANTY - CUSTOMIZED

2017 Inter Green Technologies Ltd was founded. Since 2022 it has been engaged in installation of solar power plants until their full commissioning. Our experienced engineers guarantee that the solar power plant will operate efficiently for many years.
We will install the solar power plant so that you can effectively use free energy and receive real benefits from its installation. Our company also imports solar panels, inverters, batteries, and other necessary equipment for solar power plants.
We have a license for the installation and design of solar power plants up to 30 MW, which means that we are professionals in our field!

The places we have installed

Some of them

2 000+
KVT INSTALLED

170+
CLIENTS

ishonchsavdo.uz

Installed Grid-connected solar power plant total capacity 280 kW for 20 branches of ISHONCH chain stores

British University

A network solar power plant with a capacity of 150 kW has been installed.

SUVSOZ

Installed 90 kW hybrid solar power plant, 10 kW On-Grid installed

uzumfermer.uz

The 56 kW On-Grid power plant was installed by our specialists in an arc-shaped form

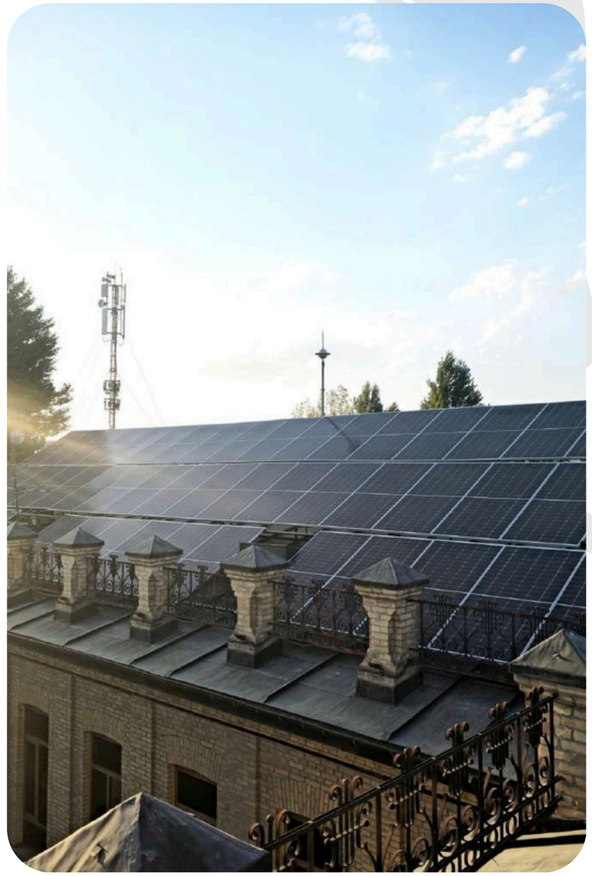

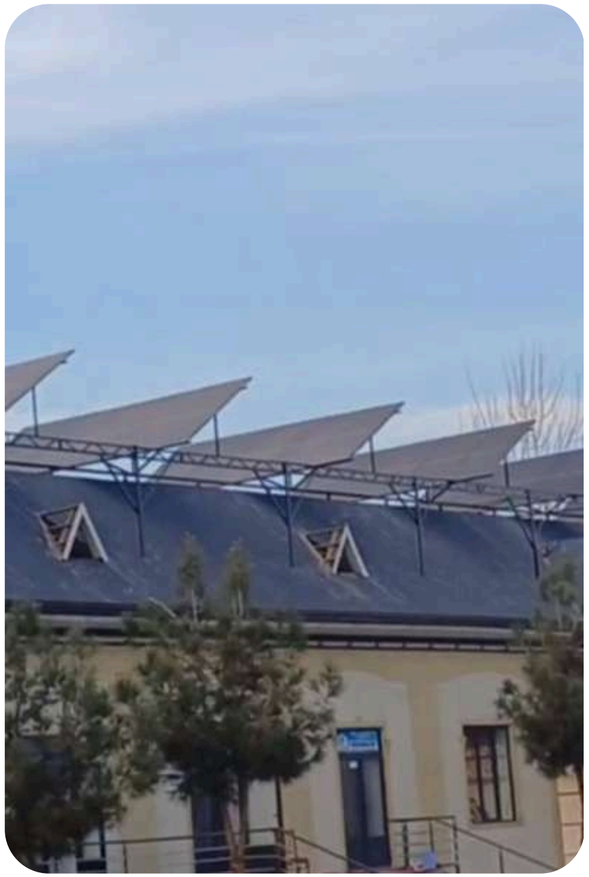

Ipak Yo’li bank

A 50 kW On-Grid solar power plant has been installed at the head office

Ipak Yo’li Bank

A 30 kW Grid solar power plant has been installed in the Sag'bon branch.

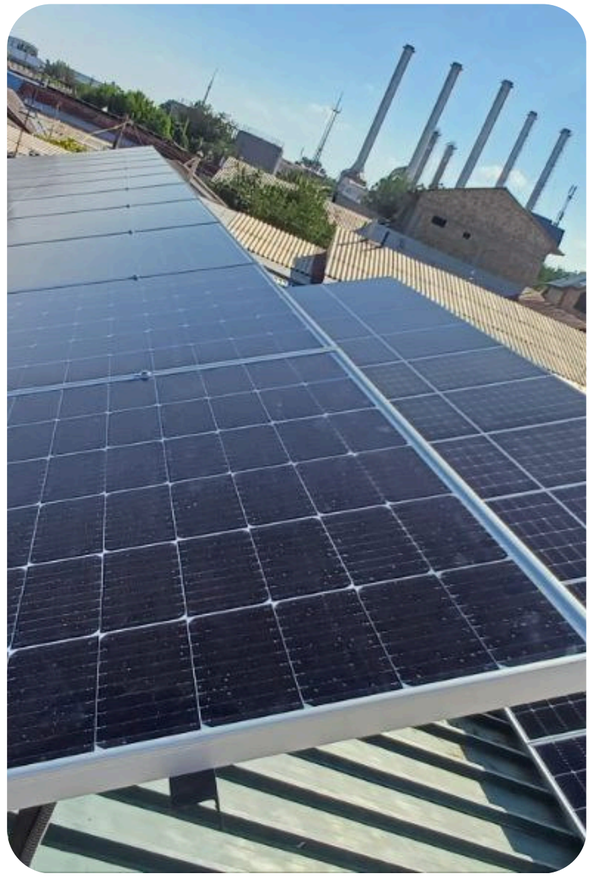

Namangan Oq qo’rg’on

18 kW hybrid SPS installed
(Unusual metal construction used)

For home

15 kW On-grid SPS installed in Tashkent

Merci Hotel

A 10 kW grid-tied solar power plant has been installed.

OUR PARTNERS

Haining Sanneng Solar Water Heater Co.,ltd it's a professinal OEM solar water heater manufacturer in China. Established in 1997, Main products are solar water heaters, which are heating water become hot water alslo some other related solar product.

SRESKY has been certified as a national high-tech enterprise for more than 10 years, with more than 2 high-tech invention patents, more than 70 product patents and 800 certificates including ISO9001 and ISO14000.ISO45001.

Peimar is an Italian company specializing in the development, research and production of high-efficiency photovoltaic modules.
development, research and production of high-efficiency photovoltaic modules. The company's constant technological
innovations guarantee in-depth knowledge of the industry.

QPOWER solar panels have excellent resistance to harsh weather conditions and can withstand significant wind forces of up to 2400 pa.
QPOWER solar panels have excellent resistance to harsh weather conditions and can withstand significant wind forces of up to 2400 pa.

We use products from brands that are in the top-5 in the world rankings.

Chinese photovoltaic company, one of the world's largest producers of solar panels (modules). solar panels (modules). Founded in 2006 and headquartered is located in Shangzhao. Member of the Silicon Module Super League

Chinese photovoltaic company, one of the world's largest manufacturers of of photovoltaic cells and solar modules.

Deye Inverter Technology Co., Ltd a leading solar inverter manufacturer and supplier of grid-tied inverters. With Deye products, you get real-time information. real-time information. Protecting your investment and extending the life of your system.

Solar Energy provides innovative energy solutions for homeowners, businesses and utilities. Discover our advanced solar inverters, batteries and energy management systems. Discover a green future with solar energy.

CLEANING, MAINTENANCE

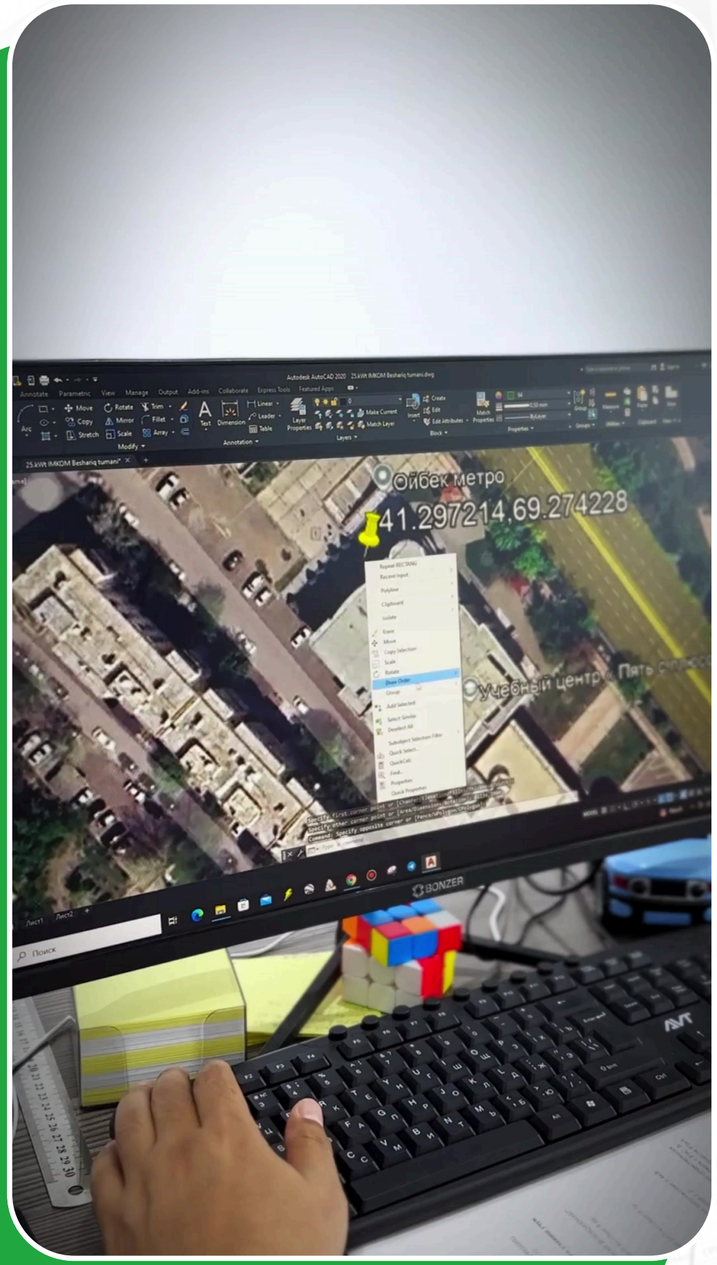

Your solar panels are no longer a problem.

WHY CLEAN SOLAR PANELS

- Improve the efficiency of solar panels
- To preserve the shelf life of solar panels
- To reduce operating costs

Power increase

+20-30%
Efficiency

MODERN AND COMFORTABLE

Project and design services made taking into account any conditions

DESIGN SERVICES

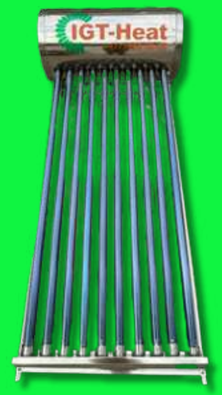

- Solar stations
- Building - electrical installation interior
- Exterior interior design
- Transformer is a construction part

Pressure 300l.
Efficiency: 60-65%.
Maximum pressure: 0.6 MPa.
Service life: 20-25+ years.

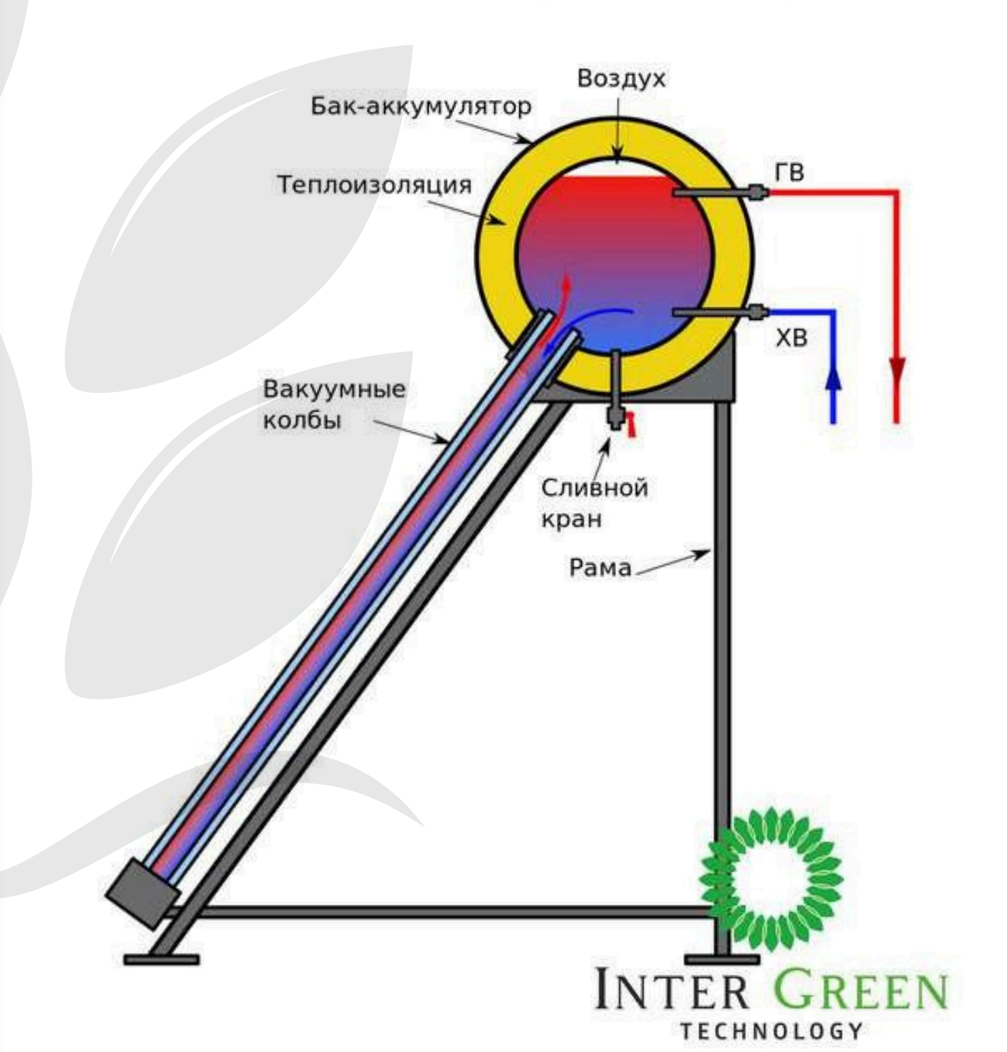

VACUUM PRESSURIZED SOLAR COLLECTORS

Key Features:

The high pressure vacuum manifold can effectively heat hot water and can be directly connected to water supply and heating, which is convenient for hot water utilization. Heat exchangers are used to transfer heat energy and work quickly. It can also be used in cold regions, because there is no water in the vacuum pipes, the pipes do not freeze or burst in winter.

PRESSURELESS VACUUM SOLAR COLLECTORS

Key Features:

Stainless steel outer casing, galvanized steel inner tank, protected against corrosion. The argon welding technology of the inner tank guarantees watertightness and durability of use. Dense polyurethane foaming ensures high thermal efficiency. Efficiently heats water and provides DHW even in winter times.

Jinko solar

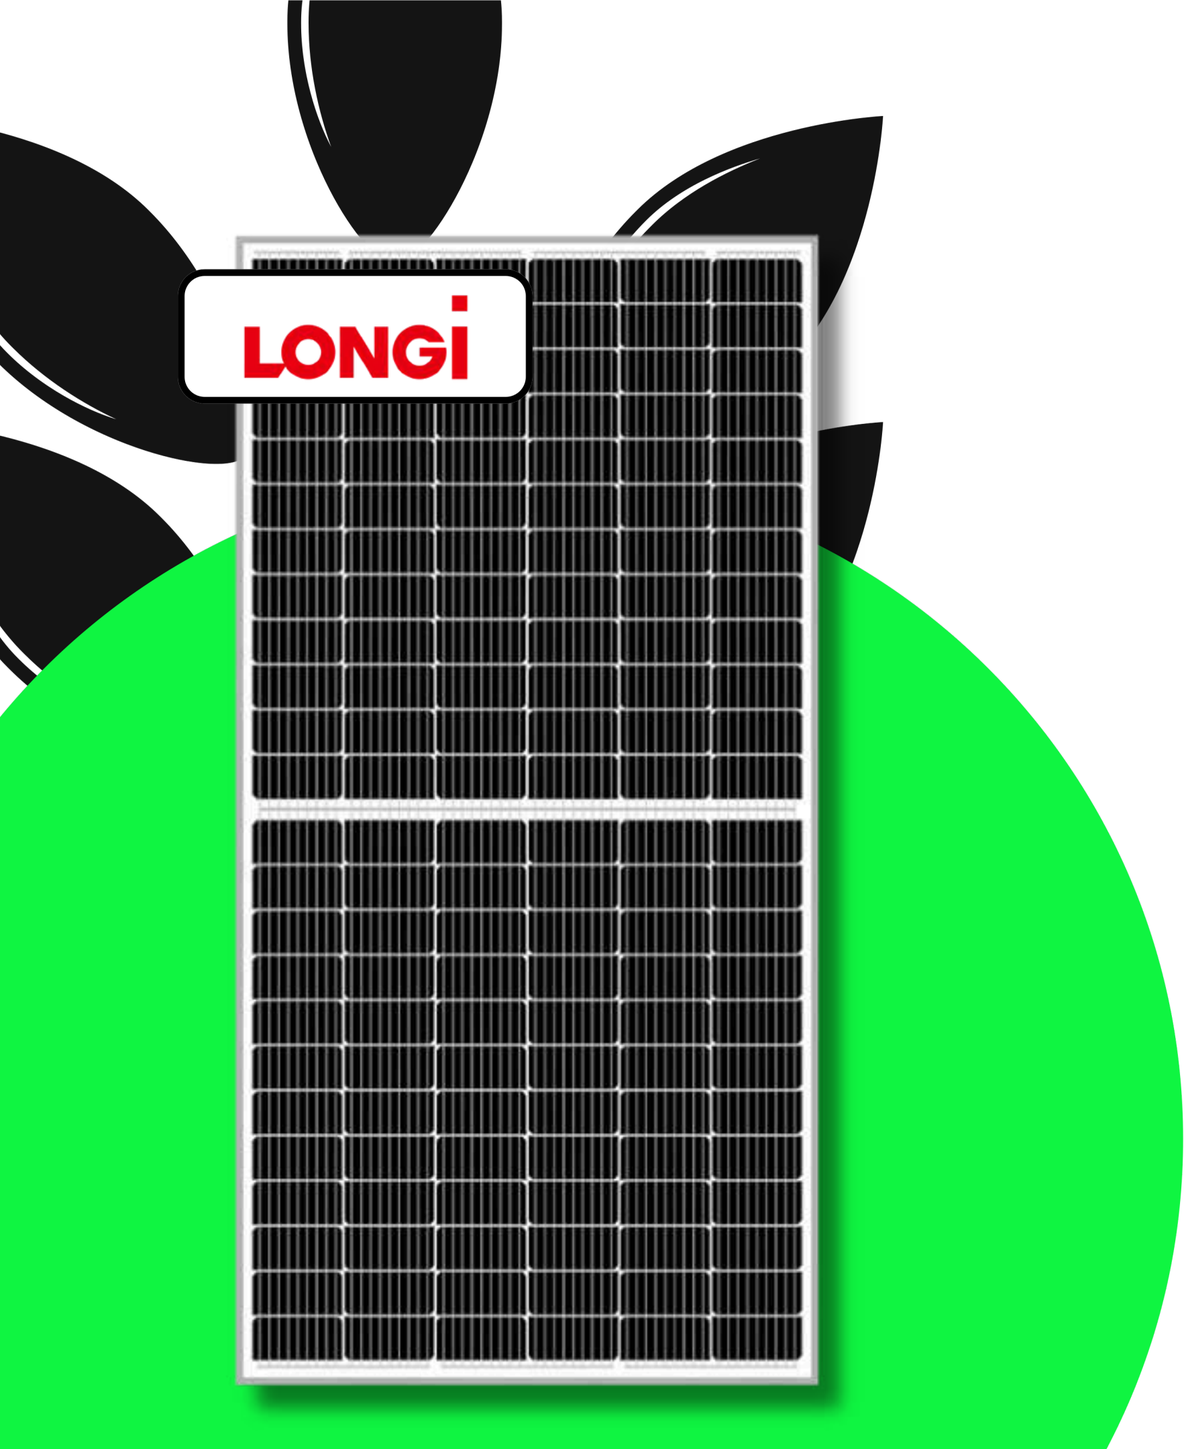

Top 5 in the world ranking.

Jinko Solar Co., Ltd. (known as Jinko Solar, stock code: 688223) is a globally recognized and innovative solar technology company.
Mission: To take responsibility for optimizing the energy portfolio and ensuring a sustainable future.

Harmless to nature

21,33%
Efficiency

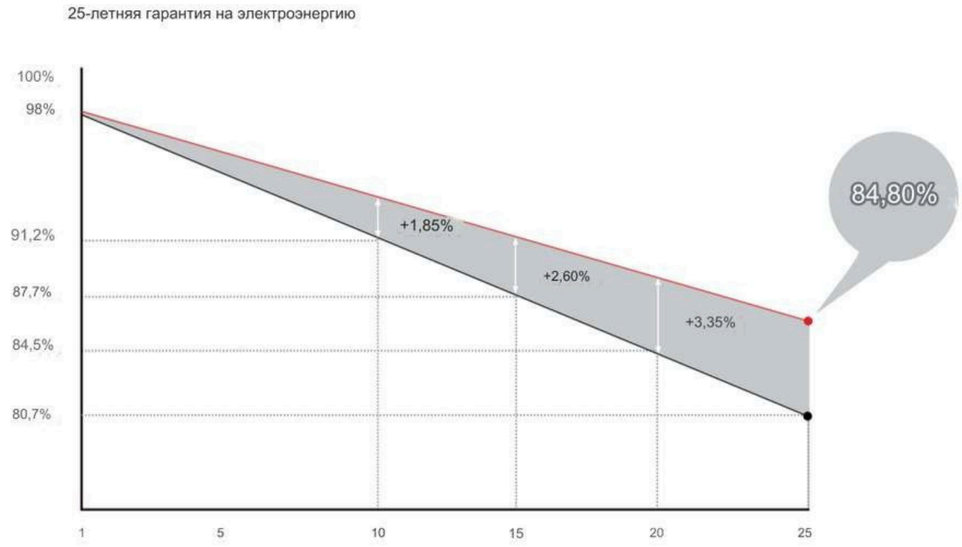

Longi solar

Top 5 in the world ranking.

Longi Green Energy Technology Co., Ltd. founded in 2000. (LONGi) aims to become the world's most valuable large-scale solar technology company. **Mission:** to maximize the utilization of solar energy to build a green world.

Harmless to nature

21,30% **Efficiency**

2,132 Patents received. 71.41 billion yen Invested in research and development.

Deye inverter

Top 5 in the world ranking.

Deye Inverter Technology Co., Ltd. Founded in 2007 with registered capital of 300 million yuan, it is one of China's high-tech enterprises and a subsidiary of Deye Group. **Mission:** to make progress every day.

Harmless to nature

98,7%
Efficiency

It was founded in 2007 with a registered capital of 205 million yuan (US$30 million).

Deye Inverter Technology Co., Ltd. specializes in providing complete photovoltaic power system solutions, including residential and commercial power plant solutions.

SOLAR PANEL BENEFITS

1

INDEPENDENT POWER SUPPLY

2

LOW ELECTRICITY COSTS

3

OPPORTUNITY TO INCREASE THE PRICE OF YOUR PROPERTY THROUGH SOLAR ENERGY

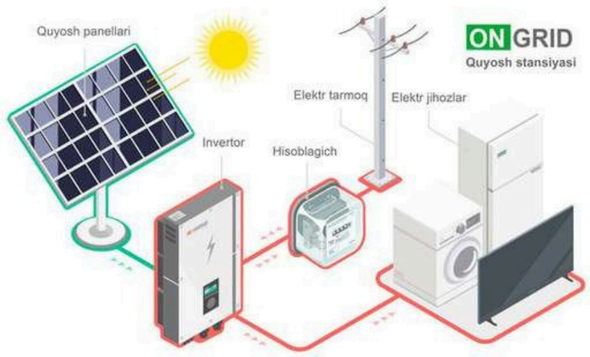

4

QUICK RETURN ON INVESTMENT

Установив солнечную фотоэлектростанцию, вы сэкономите 60% - 70% и более от ежемесячных счетов за электроэнергию!

TYPES - SPS.

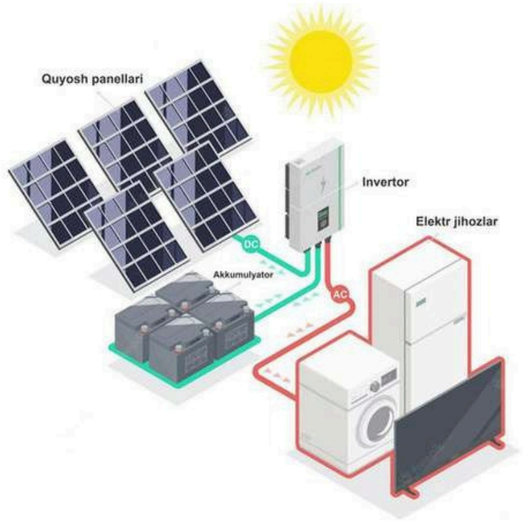

The installation location is chosen based on the time when electricity is needed most and based on whether it is for a business or an individual.

ON - GRID

The station is connected to the public power grid, providing power from the sun during the day and from the grid at night.

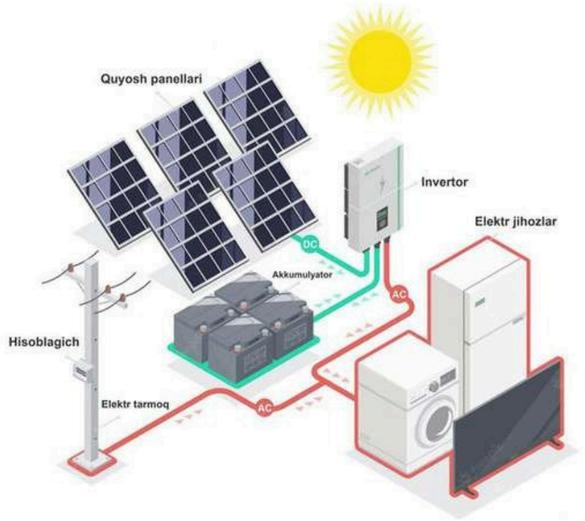

- **OVERCURRENT SALE**
- **EASY INSTALLATION**
- **EASY MAINTENANCE**

OFF - GRID

The off-grid station is not connected to the public power grid, allowing the batteries to be discharged, charged by the sun during the day and the solar station at night.

- **INDEPENDENCE FROM CENTRALIZED POWER SUPPLY**

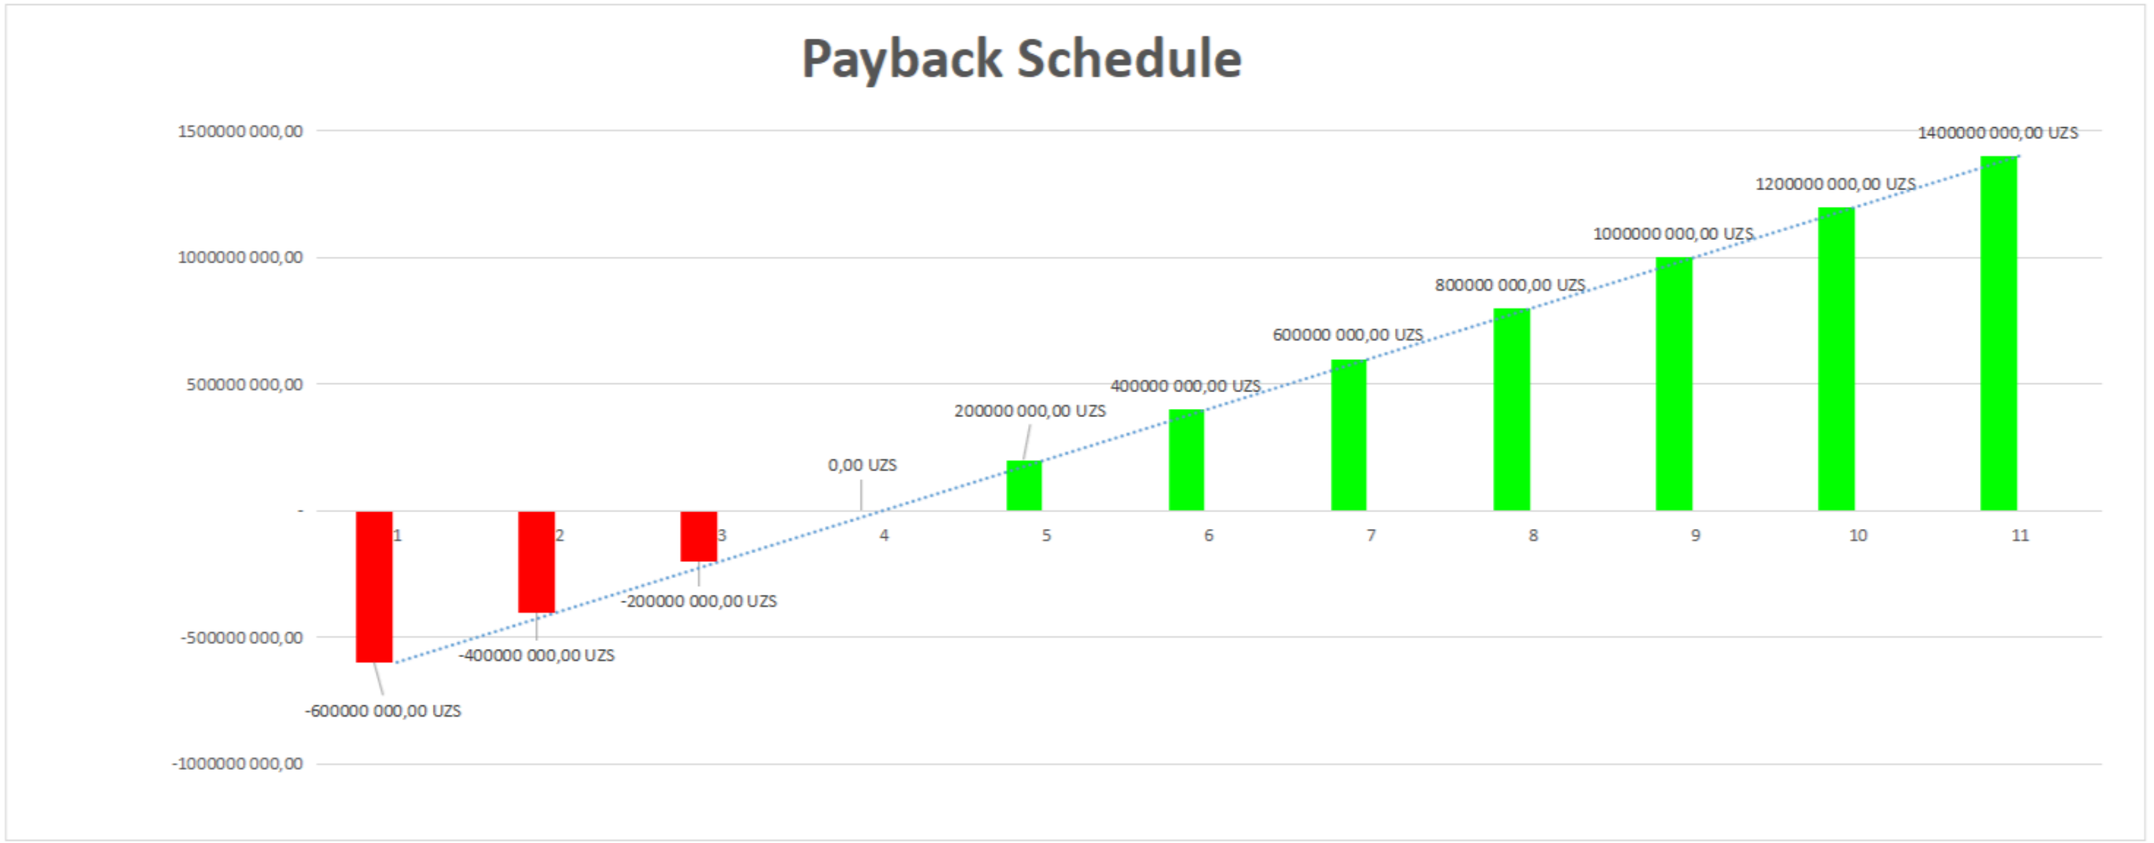

HYBRID

The station is plugged into the mains, powered by the sun during daylight hours, after the sun goes down.
the batteries are discharged.

- **60%-70% SAVINGS ON ENERGY BILLS.**
- **FULLY AUTOMATED SYSTEM**

PAYBACK SCHEDULE

This graph takes into account a 100 kW solar power plant installed at 1 kW, a sum of 6 million.

SOLAR POWER PLANT INSTALLATION PROCESS

Our experts with many years of experience advise on where to put the SFES, what capacity, and install it so that it is resistant to all weather conditions. conditions..

1

CALCULATING THE ELECTRICAL CONSUMPTION AND SELECTING THE INSTALLATION SITE

Our electrician will calculate your building's power needs and advise you on what type of power plant to install.

2

PROJECTING

The specialists draw up the design of the solar by talking to the electrician and the assembler.

3

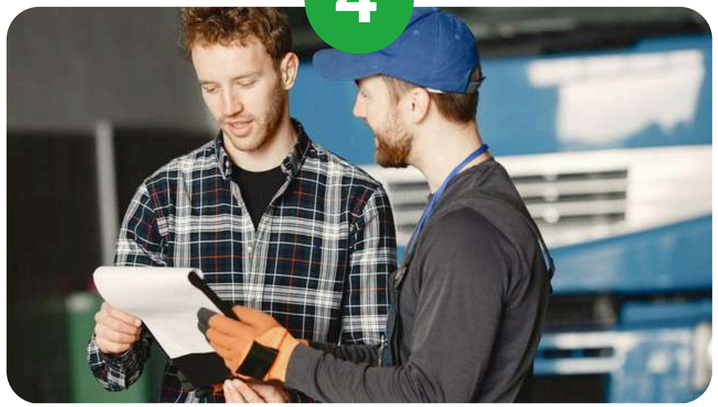

SOLAR PANEL INSTALLATION

Installers and electricians install solar panels by design using only quality equipment-materials.

FINAL STAGE

It is important to us that the customer benefits from the installed solar plant, therefore
We will fully educate you on how to effectively utilize the SFES and send you a letter of guarantee. Inter Green, even 10-20 years from now, will honor the warranty we gave you.

4

INSTRUCTAGE.

Instructing the customer on the efficient operation and technical safety of the solar power plant.

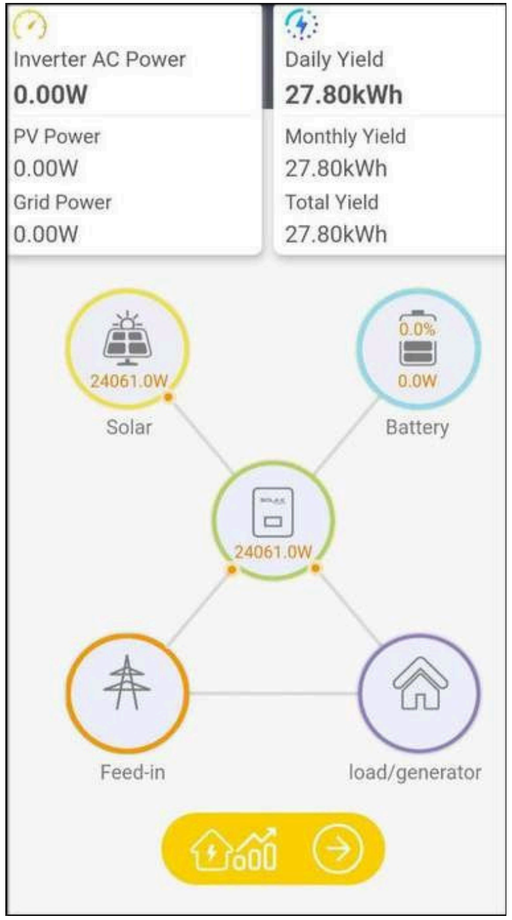

5

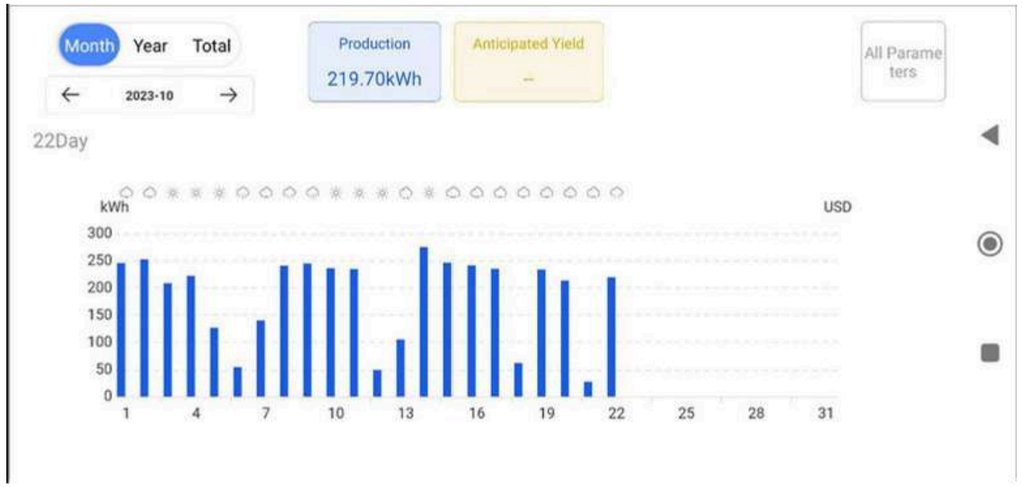

LETTER OF GUARANTEE

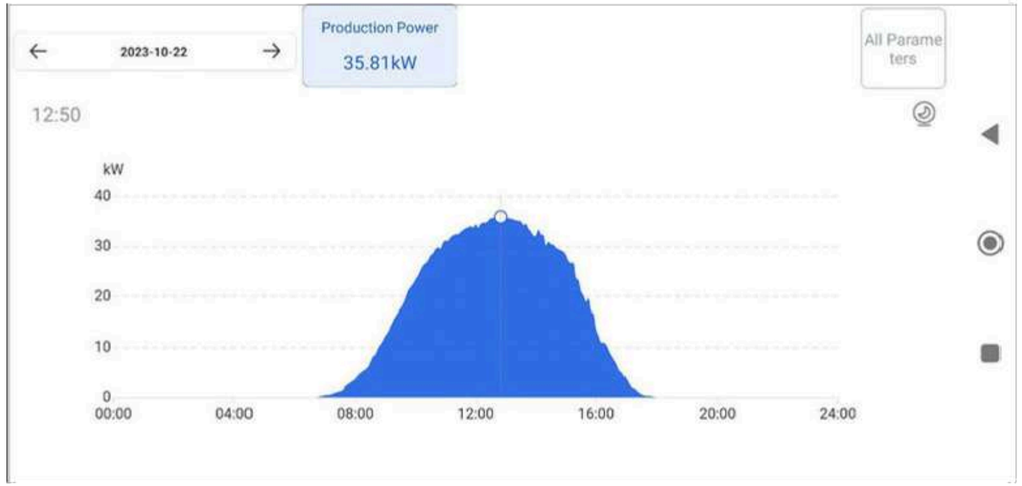

The customer is given a letter of guarantee.

ONLINE MONITORING

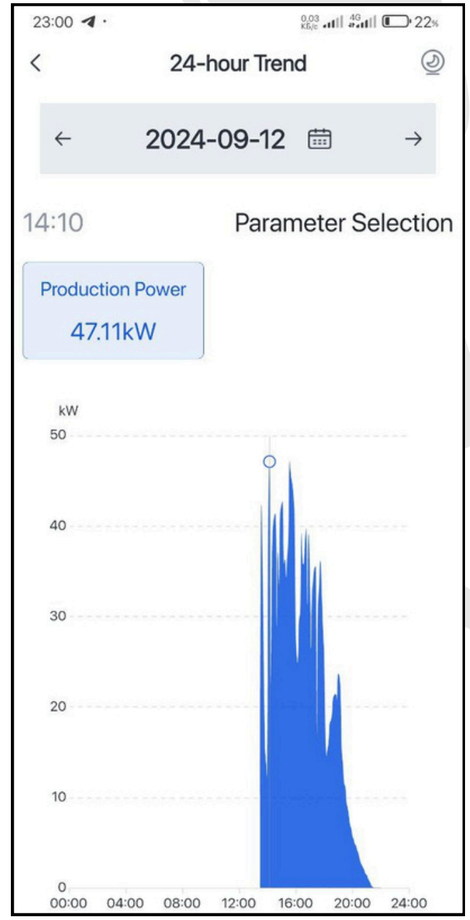

Ipak Yo'li bank
30 kVt On-Grid

You can use the app to view hourly, daily and monthly kilowatts of electricity from solar panels.

Uzumfermer.uz
56 kVt On-Grid

Why Inter Green Technology?

01

A team of experienced professionals

Inter Green has been dealing specifically with the installation of Inter Green has been installing SPS and selling the necessary equipment for it, so we have a team of specialists in this field.

02

We import necessary equipment for SES

Jinko Solar, Longi, Deye Invertor, Inverson batteri. Haining Sanneng solar water heater. We import equipment which is among the top 5 in the world.

03

After 10 to 20 years, we also fulfill our warranty

With each client will be concluded an official contract and provided with a warranty card, after 10-20 years we also fulfill our warranty.

WARRANTIES

“INTER GREEN TECHNOLOGY” LLS

On installation of stations and equipment 1-year warranty and service service.

From the manufacturer.

1. SOLAR PANELS — **25-30 лет**
2. INVERTOR — **3-8 лет**
3. SOLAR WATER HEATERS — **1-3 года**
4. SOLAR PROJECTORS — **10-20 лет**

Frequently asked questions about solar panels

01. Do solar panels work in cloudy weather?

Yes, but 50% to 60%. The panels are powered by sunlight, not a sunbeam. And they are completely independent of air temperature.

02. Do the panels need to be cleaned of snow?

The panels are installed at an angle so snow melts and falls smoothly. If more amount of precipitation, the snow can be brushed away.

03. How do solar panels work in the winter?

In winter, due to the low ambient temperature, heating is minimized and the efficiency of the and the efficiency of the panels increases. But at the same time, the duration of the sun's day the duration of the sunny day, which reduces the efficiency of the system.

04. Can the efficiency of SPS be improved in winter?

Innovative inverter technologies as well as energy storage systems help to increase the efficiency of solar power plants.

THANK YOU FOR YOUR ATTENTION

Innovative inverter technologies as well as energy storage systems help to improve efficiency. energy storage systems are helping to increase the efficiency
of solar power plants. **Call us for a free consultation.**
